

#### ■ Fleet & technology

Every vehicle in ZET Transport fleet is properly equipped with cargo securing materials (straps, anti-slip mats, Edge protectors etc.) and our drivers have necessary safety wear. Major part of our fleet & drivers is ADR ready.

ZET Transport trucks works under manufacturer's warranty. Additionally we can support our trucks with own mobile workshop available 24/7 and we also cooperate with a number of external services workshops in Europe.

We use TRANSICS fleet management system, which enables very effective exchange of information between headquarters and driver & vehicle.

ZET Transport uses its own ERP class system called SOFTRANS, created in 2001 by Polish programmers exclusively for and with the participation of ZET Transport.

## FLEET & TECHNOLOGY

#### ■ Service

We run our own fully professional truck&trailer service workshop operated by an independent company Truck Partner Ltd.

Our second partner-company is ITC Ltd., a truck & trailer dealer. Both Truck Partner and ITC helps us to maintain the Company's equipment in excellent technical condition and facilitates fleet renewal, which has a direct impact on the quality of services.

## TRUCK:

- Over 190 units
- Emission standards: EURO 6
- Average age: below 1,5 year
- Advanced telematics systems, GPS, Geofencing
- Document scanners

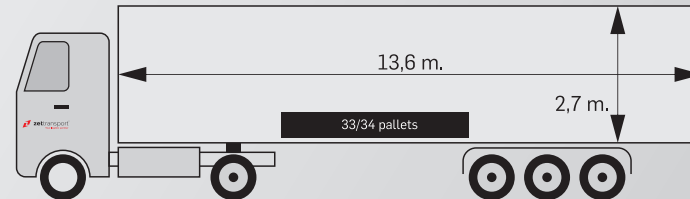

**Transics**  
WABCO company

## TRAILERS:

### CURTAINSIDER

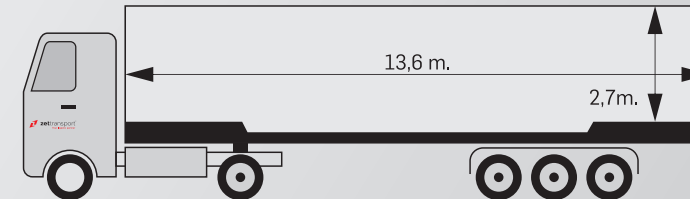

- Over 140 units
- Code XL certified
- Capacity = 33/34 pallets

Loading dimensions: | 13,6m length | 2,7m height  
| 2,48m width | Payload: 25 tons

### COILMULDE

- 25 units
- Capacity = 33/34 pallets
- Floor trough for transport of coils
- Code XL certified

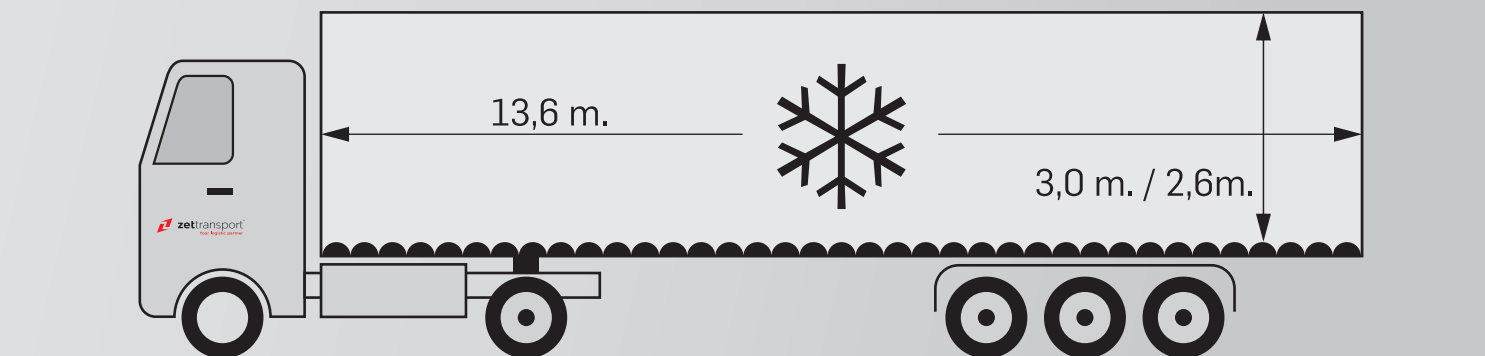

Loading dimensions: | 13,6m length | 2,7m height  
| 2,48m width | Payload: 25 tons

## AIRCARGO TRAILERS:

Refrigerated trailers to transport air cargo containers.

- 50 units
- Floor equipped with roller tracks
- Rigid walls
- Temperature controlled
- MEGA: 3,0m internal height
- Standard: 2,6m internal height

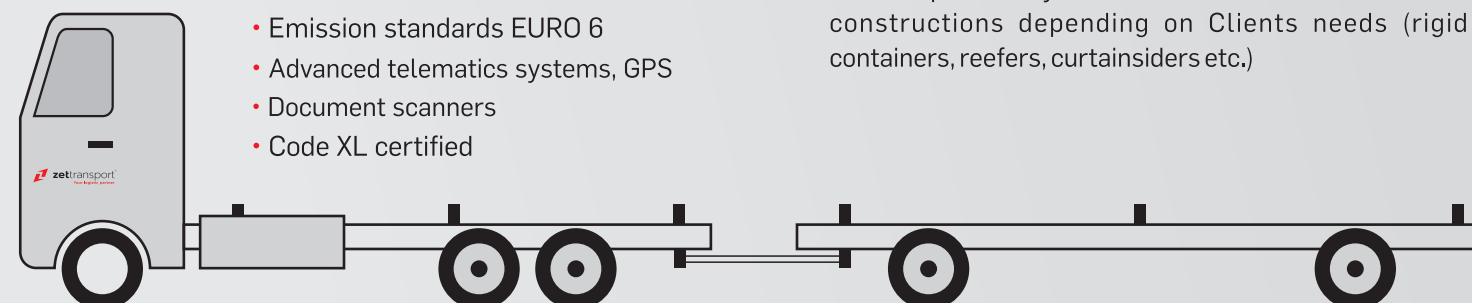

Loading dimensions: | 13,6m length | 3,0m / 2,6m height  
| 2,44m width | Payload: 24 tons

## BDF:

- 50 units
- Emission standards EURO 6
- Advanced telematics systems, GPS
- Document scanners
- Code XL certified

BDF swap bodies system allows to use different kinds of constructions depending on Clients needs (rigid containers, reefers, curtainsiders etc.)
